

Auto House Honda

COVID-19 Response

Auto House Honda has been serving the Sarnia community for over 45 years and we know that customers have come to rely on us as their trusted service provider for their vehicles. During this uncertain time of COVID-19, the Auto House Automotive group family will continue to be here when you need us.

Auto repair service has been deemed an essential service by the Ontario government and as such Auto House service department has remained open for business and ready to serve. We recognize and thank all of the incredible and invaluable local healthcare providers, grocery/pharmacy workers, first-responders, transportation drivers and other workers who are helping us all get through this difficult time. Our business will remain open and operational to service all vehicles - regardless of make or model.

Our first priority is the health and safety of our customers, employees and the community so we have taken all possible steps to implement practices and procedures as recommended by public health authorities in our daily operations. As such, although our dealership doors are closed, our service department remains open and our team of automotive experts have all chosen to show up everyday to serve our community. We have adjusted our process and operating hours to Monday-Friday from 8am-4pm. Please contact us @ 519.344.1123 to make an appointment.

From all of us in the Auto House family, our thoughts are with you and all Canadians during these difficult times. We encourage everyone to continue following the Canadian Health experts guidance on physical distancing and handwashing practices in order help all of us flatten the curve and keep our community safe.

We are in this together and will get through it as Canadians together.

Dan Brush
President, Auto House Automotive Group
